

Aceso® Interactive and Partners eCare Launch Staff and Employee Satisfaction Module

FOR IMMEDIATE RELEASE

Boston, MA, October 27, 2015 —Aceso®, a leading provider of patient engagement solutions, is proud to announce that Aceso's Hospital Television Network (HTV) was implemented and has been successfully operating at Partners Healthcare's eCare for the past 6 months.

Partners eCare is a division of Partners HealthCare located in downtown Boston and is responsible for implementing a new integrated electronic health record across Partners' many well-known healthcare institutions including Massachusetts General Hospital and Brigham and Women's Hospital.

Partners eCare chose Aceso Interactive's HTV digital media solution as part of a strategy to increase internal staff communication and satisfaction. Aceso's award winning, enterprise wide platform was originally installed in conjunction with the opening of Spaulding Rehabilitation Network's new hospital in 2013. "Once an instance of Aceso's technology is installed, every facility within the health system can leverage the platform which was a driving factor for Partners eCare" said Todd Babineau, Chief Operating Officer of Aceso.

Aceso and Partners eCare collaborated to extend the power of Spaulding's deployment to solve a new business need. The system's content management system address's the specific needs of eCare's fast paced employee population who need to stay informed of status changes, corporate messaging and real-time weather and news information. "Aceso's digital media displays have benefited fast-moving IT and clinical teams with complex project management challenges by keeping them informed and engaged as they move throughout the office space." said David King, Communications Director, Partners eCare at Partners HealthCare.

"eCare is currently using everything from performance dashboards to employee training portals to improve employee satisfaction and retention, productivity and policy compliance. Creating an employee specific product for Aceso is a logical extension of our platform and we are excited to now offer this product to the market." said Michel Perreault, Aceso's HTV Product Director.

ABOUT ACESO®

Aceso, (Uh-kesso) is transforming the patient, guest and clinician experience in healthcare. Aceso is headquartered in Boston, Massachusetts and offers patient centric solutions; UpCare™, eCareBoard™, and Hospital Television Network, (HTV) all designed to engage, educate and entertain patients in their healthcare journey. Aceso's open, enterprise wide technology architecture is powered by UpTech™ which enables healthcare organizations to interoperate with current technology footprints. Our approach is to cohesively enhance the patient experience, increase patient satisfaction scores, optimize clinician workflow and increase communication. Aceso's clients are the largest and most prestigious health systems in the United States. Please visit www.aceso.com for more information.
