

## Aceso<sup>®</sup> to Implement Interactive Solution at Mayo Clinic

January 2016, Boston, MA---Aceso<sup>®</sup>, a leading provider of patient engagement solutions for healthcare, is proud to announce the completion of an agreement with Mayo Clinic. The initial project scope includes the implementation of HTV, Aceso's digital signage solution for common area and waiting rooms at Mayo Clinic's Dan Abraham Healthy Living Center in Rochester, MN. Large interactive touchscreen kiosks will welcome and introduce guests to services available, events, testimonials, wayfinding and up to date messages. A multi-screen video wall will broadcast relevant content designed for viewing from a distance. All locations will feature Mayo Clinic's robust library of self-developed content.

The interactive digital touchscreens are professional-grade large format displays built in a slim, integrated kiosk package. Floor-standing kiosks, in both portrait and landscape orientation displays will inform visitors with self-playing wellness and health tips, trivia content, promotional and product messages and more. The interactive touchscreens will utilize IntelliTouch Plus technology designed to endure medical disinfectant wipe down procedures in healthcare environments.
